- Sustainable growth with profit
- Growth of individuals with supportive working environment
- Care for others and a sincere attitude

Actions

- Free and open communication
- Discipline and professionalism
- Teamwork and efficiency-focused actions
- Creative and personalized approach

ALTIA Brand Slogan

Being Your Reliable and Creative Partner

Message from the President

ALTIA Co., Ltd. is a manufacturing, sales and after service company specialized in automotive maintenance tools & equipment, factory machinery and power system products, providing the products and services globally. We cover all functions of planning, development, manufacturing, sales, installation and after-sales services.

Since our foundation in 1937, we have been consistently engaged in businesses to ensure the safety of vehicles and lives of people with industry leading technologies and business proposals. We always make customer oriented proposals of products and services, by visiting customer sites (Service workshop for automotive maintenance tools & equipment, Vehicle assembly plant for factory machinery products and Plants & facilities of customers.)

ALTIA, as a whole team, continue trying to satisfy our customers with proposals of products and services which contribute to the safety, peace of mind and productivity/efficiency improvements. We remain being an indispensable company to our customers and will continuously contribute to the growth of company and society.

Our goal is to be a popular and reliable business partner of our customers. Our will is also expressed in our slogan, "Being Your Creative and Reliable Partner".

To attain this goal, we will walk together with our customers and challenge to grow further, day by day. We would greatly appreciate your continued support to ALTIA.

Board Director & President
Masao Hamamoto

Strength of ALTIA

ALTIA is the only one Japanese company in the automotive tools & equipment industry, which has its own production factory. This is our great advantages over other manufacturers.

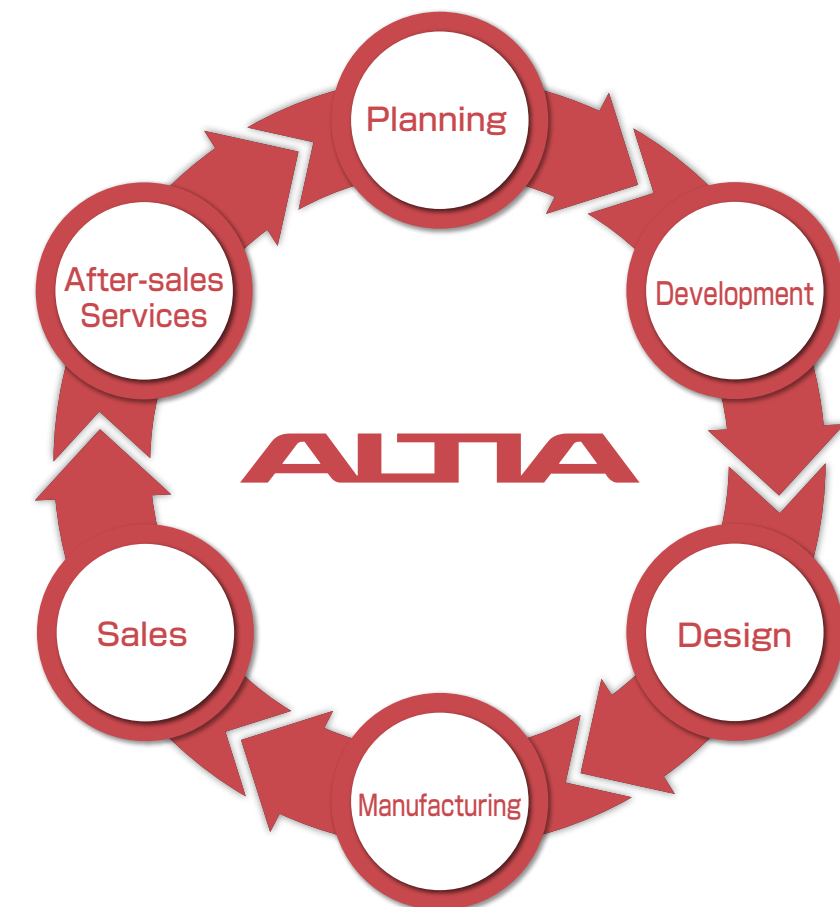

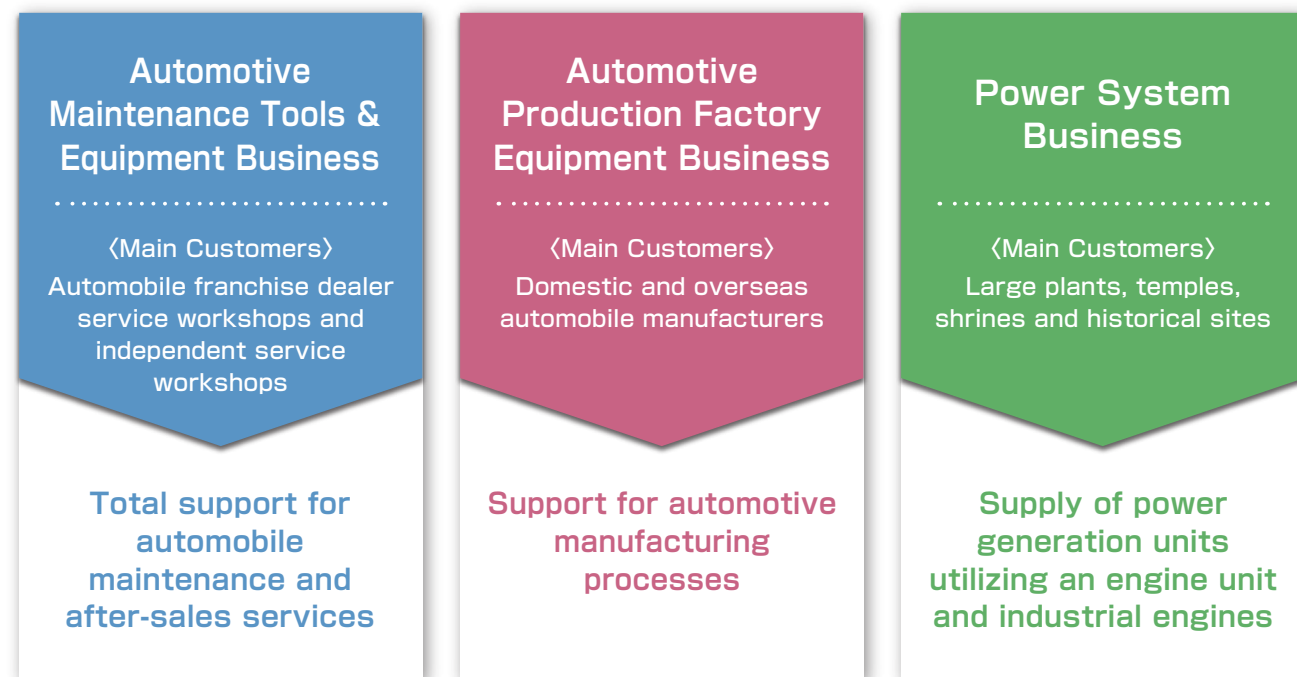

For our main products, such as vehicle testers and lifts, we develop and manufacture them internally.

By performing all processes from planning, development, and design to manufacturing, sales, and after-sales services internally, we can offer our products rapidly and efficiently.

We deepen our core technologies with in-house development and manufacturing function, and produce attractive and high-quality products.

Business Domain

Three Main Businesses

Iwaki Factory

R & D Center (in Iwaki Factory)

Automotive Maintenance Tools & Equipment Business

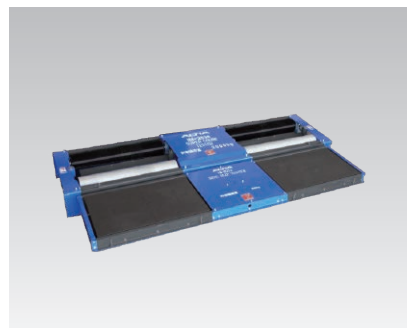

We manufacture and sell maintenance tools & equipment for car dealers and service workshops and provide various products and services with additional value.

In the automotive maintenance tools & equipment business, we sell vehicle inspection equipment, various repair & maintenance equipment to the service workshops of car dealers and independent

garages. The main products manufactured at our Iwaki factory in Fukushima, Japan are in high reputation, meeting various customer needs.

We have 8 branches and 110 service stations throughout Japan and support our customers in installation, after-sales services and periodic maintenance. We strive to continue proposing

value added products and service menus to make customers satisfied and feel confidence with us.

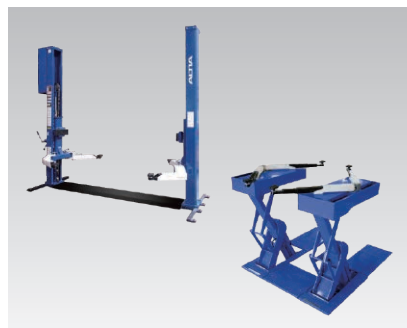

..... Vehicle Inspection Tester Equipment

We plan and develop inspection testers needed in automobile workshops and sell them to governmental vehicle inspection centers, car dealers, and automotive maintenance workshops all over Japan.

<Key Products>

- Computerized vehicle inspection system "CAI Series"
- Brake and speedometer composite tester "Super Combi Tester"
- Sideslip tester

..... Lifts for Automobile Maintenance

Lifts are required for various kinds of automobile maintenance work from periodic inspections to heavy maintenance. We manufacture and sell variety of lifts for vehicles from passenger car to big truck.

<Key Products>

- 2-Post lift "Sky Max"
- Pantograph-type lifts "Mega-power Lift III" "EP Lift"
- Lift for large-sized vehicles Flat & Flat Super Twin Lift

..... Washing Machines

Our washing machines can be used for not only car washing but also washing of various things in various places. The machines wash away dirt by spraying pressurized hot or cool water with a high-pressure pump from a jet nozzle. ALTIA manufacture and sell environment-friendly and energy-saving washing machines.

<Key Products>

- High-pressure hot water washing machine "Mega-shine Eco Series"
- High-pressure washing machine "Aqua Shine"

..... Wheel and Tire Maintenance Equipment

Tires and wheels support footwork of a vehicle. Tire Changer is equipment to assemble and disassemble tire and wheel speedy and safely. Wheel Balancer is equipment to set the correct wheel balance. We also supply wheel and tire related equipment applicable to new technologies such as run-flat tires.

<Key Products>

- Tire changer "Smart Winning Series"
- Wheel balancer "Smart Road Series"
- Large-sized tire changer "Mega-wing"
- Large-sized wheel balancer "Mega-road"

..... Body Repair and Paint Equipment

Body repair and paint equipment helps to repair body panel and paint damage occurred by an accident. We sell equipment which records the body alignment data and applicable for water-base paint and high tensile steel repair. Also, we sell aiming machine for Advanced Safety Vehicles (ASV).

<Key Products>

- Painting booth applicable for water-base paint
- Spray gun cleaner applicable for water-base paint "Spray Gun Cleaner Eco"

..... Environment-friendly equipment

We sell environment-friendly equipment such as A/C refrigerant recycling machine and waste oil and lubricant collection and disposal system from scrapped vehicle.

<Key Products>

- A/C refrigerant recycling machine
- Diesel Particulate Filter (DPF) cleaner "DPF Refresher"
- Waste oil and lubricant collection system "One-stage Drain"

Automotive Production Factory Equipment Business

We are highly regarded for our advanced technologies and attentive services by customers all over the world.

We supply automobile production factory equipment, such as tire assembly machine, fluid vacuum filling equipment, and final tester systems to automotive manufacturers. We are regarded for our advanced technologies and attentive services. Our products are widely used not only in domestic factories but also in overseas factories.

We have the ability to make proposals to meet various needs, such as improvements in production efficiency, quality, and cost reductions, with focusing a high level of satisfaction to our customers.

.....Tire Assembly Equipment.....

Tire assembly equipment is equipment to assemble a tire and a wheel automatically. The equipment supports a wide range of tires, such as high-rigidity tires, temporary tires, and tires for light vehicles to large trucks. Transfer conveyor used before and after the assembly equipment and tire balancer are also available as one system. The high-performance tire assembly equipment can assemble a tire and a wheel with high speed, and the safety of the equipment is proven. This equipment contributes to labor and headcount savings.

..... Fluid Vacuum Filling Equipment

This equipment fills a brake system, clutch system, and cooling system with brake fluid and coolant in a vacuum and tests the airtightness of the systems. This equipment contributes to quality improvement, labor savings, and cost reductions. This equipment can be automated using a general-purpose robot.

.....Testing Equipment.....

Various testing equipment, such as a wheel alignment equipment, sideslip tester, free roller tester, brake tester, and headlight tester to inspect and adjust the driving system are available. We provide safe, secure, and high-performance products based on years of experience and know-how accumulated through joint development with customers.

Power System Business

We provide high-quality power sources to a wide range of customers, from large plants to important cultural properties.

In the power system businesses, we provide emergency power units and industrial engines. We have provided power units for fire pumps and general pumps installed in plants, petrochemical complexes, hospitals, important cultural properties such as temples and shrines, and large commercial facilities for over 40 years. The emergency power units used for firefighting facilities are certified by the Nippon Engine Generator Association (general incorporated association). Gas engines for gas heat pump (GHP) air conditioners and industrial engine unit mounts for special vehicles are also available from ALTIA.

.....Emergency Power Units.....

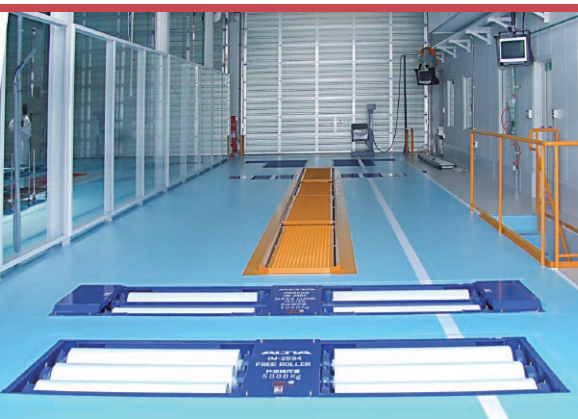

We provide emergency pump power units and generators by packaging or converting (such as automatization) to suit customer needs. Features of the emergency power unit are (1)low noise, (2)secure start-up, (3)easy-to-install unit, (4)ease of inspections and repairs, and (5)speedy and reassuring service systems. The units are used in plants, petrochemical complexes, and important cultural properties, such as historical sites, and have gained trust and a good reputation from many customers for many years.

..... Industrial Engines

We provide automobile engines as industrial engines for various applications, such as GHP air conditioners and track motorcars. We make various conversions and changes to the industrial engines, such as automatization and specification changes per application to suit various needs and provide high-efficiency, high-performance, and high-reliability power units.

Quality and Environmental Policies

ALTIA has acquired the certificates of ISO9001:2015 (quality management systems) and ISO14001:2015 (environmental management systems).

ISO9001

Quality Policy

We establish a quality management system and actualize true customer-oriented services.

1. We create and provide value that can be selected by customers.
2. We aim to be the top quality engineering company.

Scope of Certification	<ul style="list-style-type: none"> ● Design, development, manufacturing, installation, and maintenance of automotive factory production equipment ● Design, development, manufacturing, installation, and maintenance of emergency power units, gas cogeneration equipment and industrial engines ● Design, development, manufacturing, installation, and maintenance of automotive maintenance tools & equipment, vehicle inspection equipment, and environment-friendly equipment
Certified Business Offices	Headquarter, Sapporo Branch, Sendai Branch, Nagoya Branch, Osaka Branch, Hiroshima Branch, Fukuoka Branch and Iwaki factory and R&D center

ISO14001

Environmental Philosophy

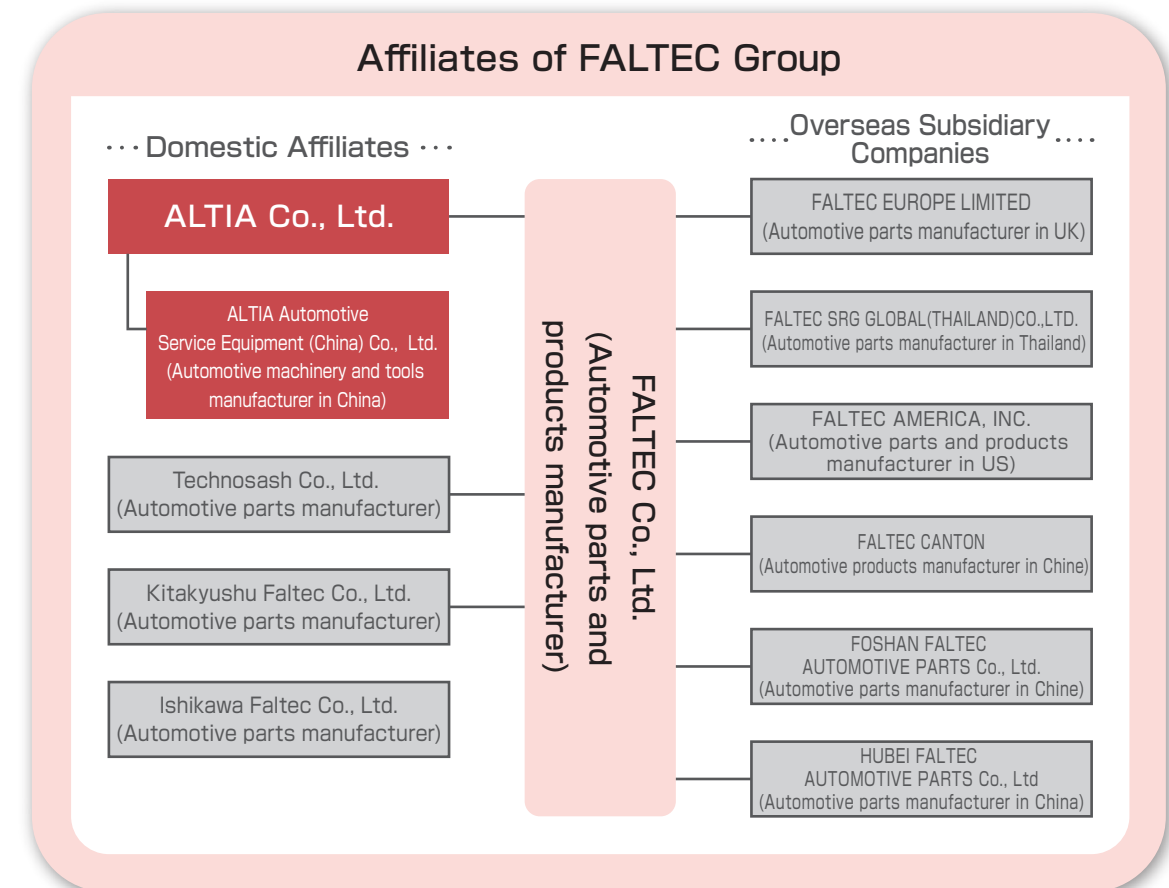

As an automotive engineering company, we contribute to further development of affluent society by applying compassion and friendliness to environment into our products and corporate activities.

Environmental Policy

We establish and operate an environmental management system to actively reduce the effects on the environment as a reliable company that contributes to society.

1. We clarify and observe environmental laws and regulations, other requirements with which we agree, and voluntary standards.
2. We reduce environmental loads by selecting eco-friendly materials and methods in the product planning and design phases.
3. We promote resource and energy savings and green procurement through office work.
4. We continue making efforts to upgrade and improve the environmental management system and prevent environmental pollution.
5. We set environmental objectives and targets within technically and economically feasible scope and review the objectives and targets periodically.
6. Every one of us from top management to individual employees observes the environmental policy to thoroughly develop a corporate culture to actively tackle improvements to environmental problems.

Faltec Group Company Mission Statement

Providing Valuable, Leading-Edge Products and Services to Help Create a Beautiful, Prosperous Automobile Society

Corporate Principles

1. Growth with Profit

At FALTEC Group, the first goal of our business management is to generate profits because sound, sustainable growth cannot be achieved without profitability. Continuous, profitable growth is proof of the trust that society places in a company.

2. Customer Orientation and Environmental Considerations

FALTEC Group manages its business with an essential focus on customer satisfaction and consideration for the earth's environment.

3. A Cross-Functional, Global Approach

The FALTEC Group takes a cross-functional, global approach in dealing with complex changes and tackling every challenge in our constant effort to innovate.

4. Fair, Ethical and Legally Compliant Corporate Practices

The FALTEC Group, in its effort to survive and grow as a business entity, maintains a constant awareness of its corporate social responsibility. Thus we steer the business so that all our employees contribute to society as good citizens.

Activity Guidelines

1. Improvement and Speed

The FALTEC group employees are ceaselessly devoted to improvement, and in that mission we work with speed and urgency.

2. Free, Creative Thinking and Open Communication

The employees of the FALTEC Group encourage free, creative thinking, and maintain open vertical and horizontal communication as the means to invigorate the organization.

3. Trusted Partners

The employees of the FALTEC Group cherish trust, which is an essential value. Thus our employees pledge to join hands with customers, their associates, shareholders and society, and advance along with them as partners through legally compliant, ethical business practices.
