● Effective cleaning flow

- Equipped with micro bubble function to enhance the cleaning effect
- Effectively clean the oil line with a washing fluid containing bubble.

● Promote engine oil change

- Collect all the washing fluid accumulated on the bottom of the oil pan.
There is no darkening of the oil after oil change.
- The quality improvement of oil change leads to the improvement of customer satisfaction..

Engine Auto Refresher

MADE IN JAPAN

Delivering incredible cost performance, efficiency and usability

Engine Auto Refresher is easy to use and super effective; a truly next generation engine oil line cleaning machine.

Hassle free! Cleans up to 20 vehicles in succession!

Engine Auto Refresher can clean up to 20 vehicles with just a single cartridge of cleaning fluid. And thanks to the polytank cartridge system, changing the cleaning fluid is quick and easy.

Lightweight and compact.

Fits into a small space. Easy to move.

Cleans almost every make and model.

The standard adaptor set is capable of cleaning most Japanese models. An optional adaptor is capable of cleaning foreign models too.

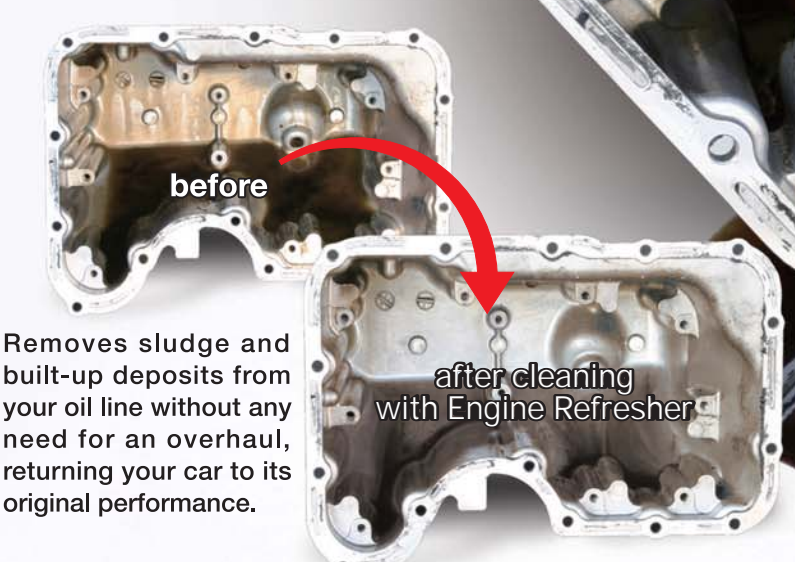

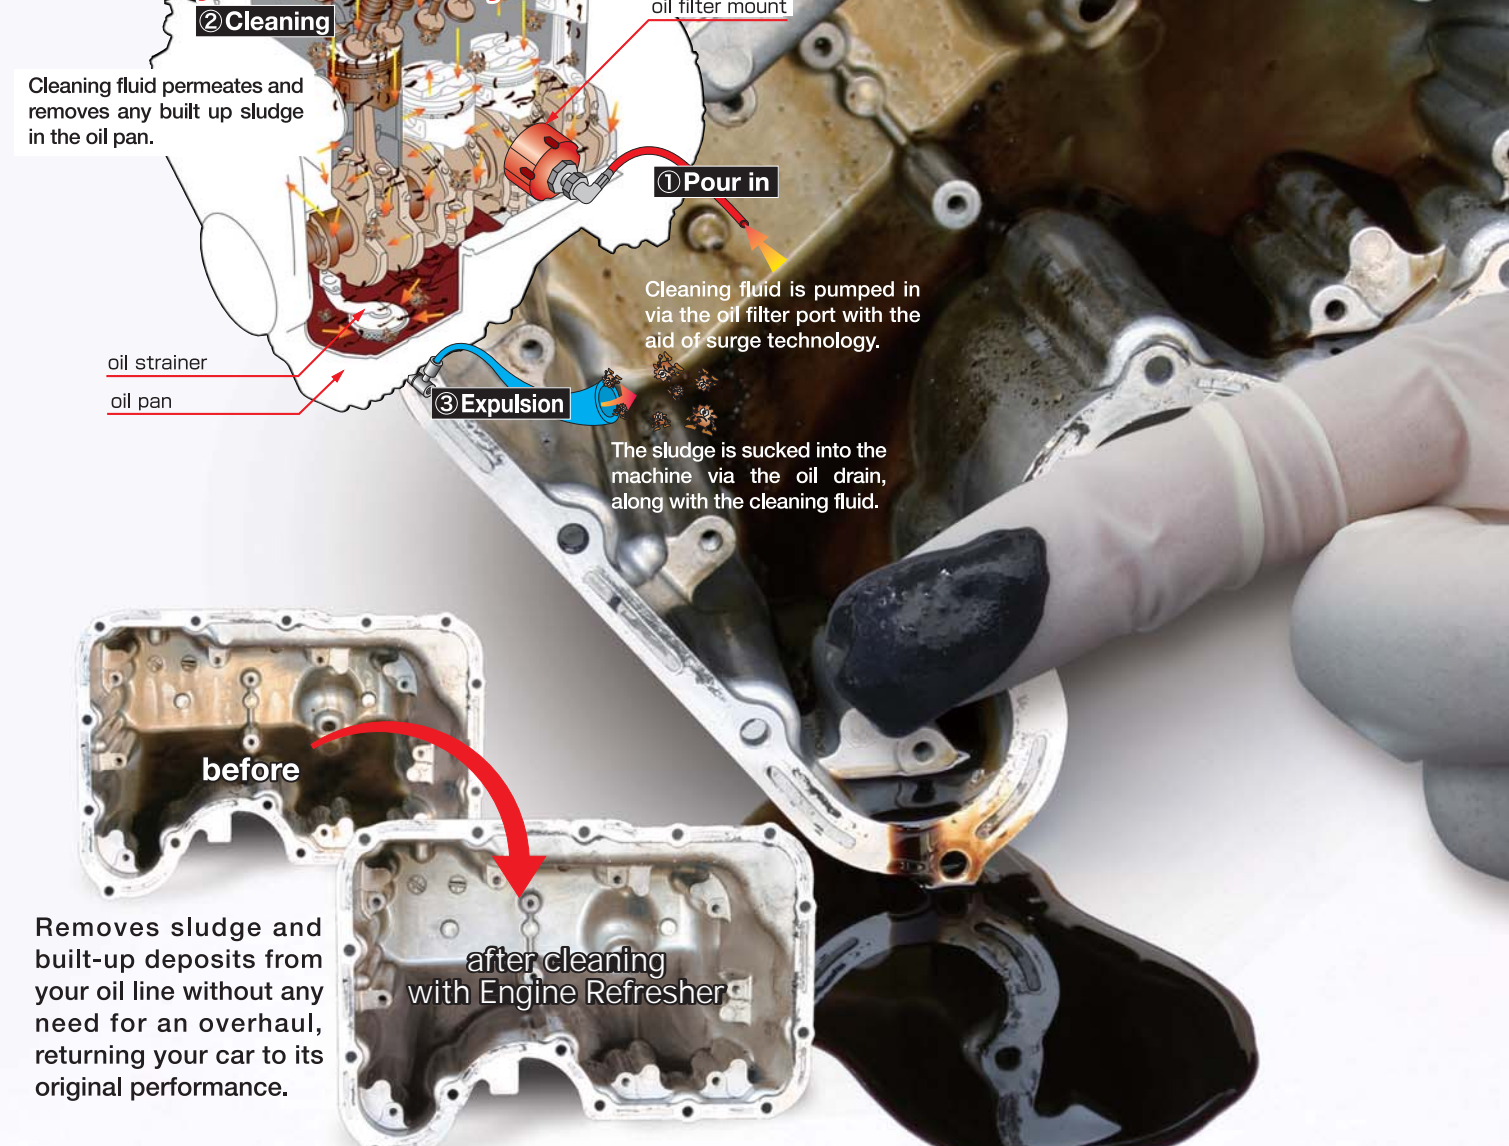

Easy to use Just press the start button!

Choose from three settings – small, medium, or large – depending on the amount of oil. Features a soft-touch control panel designed with usability in mind.

Enhanced cleaning efficiency thanks to surge pressure! Specialized surge technology alternates cleaning fluid and air at high pressure to clean every nook and cranny.

Removes sludge and built-up deposits from your oil line without any need for an overhaul, returning your car to its original performance.

Works fast!
Oil change and cleaning takes about 15 minutes

Results you can check with an oil gauge. Comprehensive cleaning.
Removes sludge that a regular oil change doesn't reach, maximizing the efficiency of the new oil.

A comparison of engine oils containing sludge

A comparison of engine oil after cleaning with Engine Auto Refresher and regular untreated oil. We investigated the amount of sludge in engine oil.

- ① Engine oil after running for 5,000km
- ② A sample taken after 10 minutes of engine idling after a standard oil change.
- ③ A sample taken after 10 minutes of engine idling after cleaning with Engine Auto Refresher.
